Well?

We're playing with the concept of "whale, well, and wail" and using those symbols in our design. The temple can be a serious place, but it can also be a place to express joy, fond memories, and a place where we sometimes find ourselves telling our favorite stories of loved ones passed, often with smiles and laughter.

Zagolith

Zagolith is a magical monolithic sculpture series inspired by my exploration into the combination of mild and stainless steels. The dissimilarity of these materials that bond metallurgically can represent the unity of our community comprising diverse individuals. The original Zagolith sculptures appeared at Burning Man in 2022 and are exhibited live at the Arvada Center. This new design is inspired by the original, but it has an entirely new geometry.
